Introduction

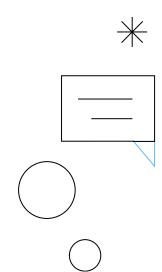

Introduction

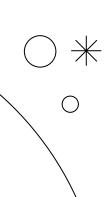

Restaurant booking websites simplify table reservations, enhancing the dining experience for diners and restaurant owners. Diners easily find and book tables, while restaurant owners save time and money with online reservations, using data to build up their business.

Problem Statement

Problem Statement

Indicisive

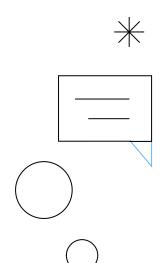

Lack of Information

Time-consuming

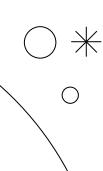

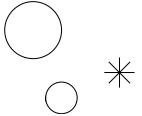

Aim of Objective

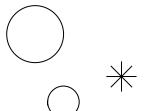

Aim of Objective

Improved Experience:Increase the dining experience by allowing customers to choose preferred dining times, food recommendations, provide full information and reducing wait times upon arrival through the website.

1. Food Recommendations

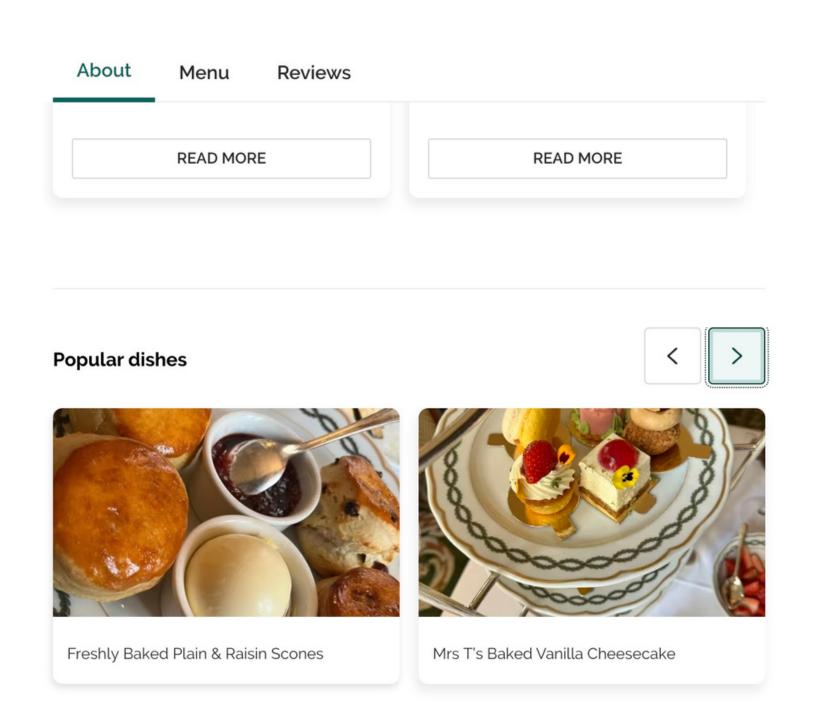

2. Provide the information

3. Time efficiency

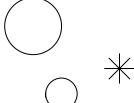

1.Food Recommendation:

Food Recommendations: To provide users with signature food recommendations and dining history, thereby improving their restaurant selection and ordering food experiences.

Restaurant menu

2.Provide the information:

Provide full information: about restaurants, such as menus, price of the food, and allowing users to make informed decisions about what to eat.

\$3.90 | 1.60 ម៉ឺនរ

\$3.90 1.60 HSI

\$2.90 1.20 881
